

Cleaning Cloths

Description and application

Qeshfloor cleaning cloths are special cloths for cleaning the hands and also tools. Especially when using epoxy and polyurethane resin products, Qeshfloor cleaning cloths ensure that the resins do not adhere to the skin.

Qeshfloor cleaning cloths also remove oil, grease, general dirt, many sorts of paint and (non-hardened) synthetic resins on the skin, floor and tools..

For best results, use the cloths regularly throughout the working day. This prevents dirt becoming ingrained in the skin.

Qeshfloor cleaning cloths can be used to clean your hands whilst working. Water is not required.

Use

- ▶ Remove the top from the container.
- ▶ Stick the first cleaning cloth through the central opening.
- ▶ Click the top back onto the container.

The cloths can damage various types of plastic / painted surfaces.

Important

- ▶ Avoid contact with the eyes. If contacted with the eyes, immediately flush the eyes with a lot of water and if necessary consult a doctor.

Properties / product advantages

- ▶ Very effective cleaning
- ▶ High degreasing ability
- ▶ Quick and effective
- ▶ Can be used universally
